Extensive Arrival of Blacks from . Canada.

Yesterday morning, the packet Union ar-rived from Port Stanley, Canada, with six teen fugitive slaves, who had escaped from the South at various periods within the last two years, and who had been living at the heard settlement at Chatham, Canda West. Becoming weary of Canadian freedom, which to many blacks, embraces the scalled liberty of going inadequately clothed, and of being nearly starved to death, they were about to return to the South, preferring plantation life to the responsibilities attendant on a state of existence for which cir-cumstances have rendered them disqualified One family, consisting of a colored man, his mother, wife and three children, who his mother, wife and three children, who escaped near Paris, Kentucky, about one year ago, after the experience afforded by a hard Canadian winter, began to sigh for their "Old Kentucky Home," and a short time ago they wrote to their master, informing him of their desire to return, and requesting him to meet them, and they expressed their gratification at the meeting in a manner, which deputed a sincer reason. pressed their gratification at the meeting in n manner which denoted a sincere regard for him. "Old Austy," a venerable negress, whose black and shining face stood out in strange contrast with her hair, white as the driven snow, took occasion to "spress her-mind to regard to Canada "Dey kin all mind in regard to Canada "Day kin all talk about their freedom over dar, (pointing with a cane-brake finger across the blue water in the direction marked by the Union's wake,) but I'd a heep leveyer stay with we dem down in ole Kentuck."

wake, but I'd a beep leveyer stay with we dem down in ole Keutuck.

The entire party took the 11:30 a. m. train for Ciucionati, happy in the thought that they were going home. What a capital opportunity it would have been for Peck, Bushnell & Co., to have got up a rescue. If it was a noble act to liberate one fugitives whose most ardent desire was to return to the South with his master, how much more they might have distinguished themselves by rescuing sixteen fugitives, who, weary of the task of taking care of themselves were flesing to their Southern homes.—National Democrat

This "Conn" expels the miasmanic poison of Feven and Ague from the system, and pervount the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in billions districts, where Feven and Ague prevails, every body should have it, and use it freely, both for cure and protection. It is hoped this price will place it within the reach of all—the poor as well as the rich. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermitments is, that it contains no Quinine or mineral, consequently it produces ne quintsm or other hydrone freets whatever upon the constitution. Those cared by it are left as the challenge. Ferer and Ague is not alone the consecutive

Rever and Agus is not alone the consequence of the missmatic poison. A great variety of disorders arise from its irritation, among which are Neuralgia, Rheumatism, Goat, Hoadache, Rlindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Splean, Hysteries, Pain in the Bowels, Colic, Paralysis, and Derangement of the Stomach, all of which, when originating in this cause, put on the intermitismat type, or become periodical. This 'Ctrax' expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants, and persons travelling or temporarily residing in the malarious districts. If taken occasionally, or daily, while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is seen more valuable for protection than cure, and few will over affect from Intermitrents, if they avail themselves of the protection this roto-edy affords.

Patients in advanced stages of the Disease. So wide is the field of its usefulness, and so So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from slarming and even desperate discases of the lungs by its use. When once tried, its superiority over every other medicine of his kind is too apparent to escape observation, and where its virtues are known, the public no longer heatrate what antidote to employ for the discressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
